Steps to Reinstall BDE on a Workstation

Remove BDE

- Open the Windows Explorer locate the following folders:
- Delete the Idapi folder.
  C:\Idapi
- Delete the Borland folder.
  C:\Program Files\Borland
  C:\Program Files\Common Files\Borland Shared.

  Remove other versions of BDE.
- Click **Start; Find; Files or Folders**.
  Under Named type, **Idapi***
  Search the local drives.
- Remove any Idapi folders found. (Commonly under Corel/Shared/ if using Wordperfect)

Note: If you cannot remove all Borland files because they are in use, remove all files possible &
any registry keys. Restart the workstation and delete the rest of the files.
Remove BDE Registry Keys

- Click **Start; Run** Type in **REGEDIT** and press **Enter**.
- Make a [backup of the registry](#)
- Click **h_key_curent_user; Software**
  Delete **Borland**
- Click **h_key_local_machine; Software**
  Delete **Borland**
- Close the registry editor.

Reinstall BDE:

- Place the Timeslips CD in the CD-Rom drive.
- Exit the Timeslips installer.
- Click on **Start; Run; Browse**.
- Locate the CD-Rom drive.
- Open the **Timeslip** folder.
- Open the **Bde32** folder*.
- Click on the **Setup.exe** and click **Open**.
- Click **OK** to run the install.

After installing, open Timeslips.

***NOTE:** You do not need to reinstall BDE16 unless you are converting data or interfacing
with an application that uses the 16-bit BDE link.
