

The latest release of Sage Timeslips has the enhancements customers like you requested most!

**SAVE 20%**

On Timeslips 2020 license!<sup>2</sup>

**OR**

**SAVE A TOTAL OF 30%**

when you get Sage Timeslips 2020 and Sage Business Care together!<sup>3</sup>

You talked and we listened!

The result is Sage Timeslips 2020, with more customer-requested enhancements than we've had in years. You'll find a list of these new enhancements at right, with details on the flyer enclosed.

**This major release comes at a perfect time for you, since you really should get back on a supported version.**

You've been using an out-of-date and unsupported version of Sage Timeslips for sometime now, and you're really putting your business at risk by doing so.

With no access to support, if you encounter any issues,

**billable hours may be lost**, and successful completion of your billing cycle may be interrupted. Further, if you are using Sage Timeslips 2016 or an earlier release, **you're missing the SQL-like Firebird database platform** that improves overall performance and speed (in some cases five times faster than your Sage Timeslips) and is more resilient to corruption due to network transmission outages or latency.

**You're also missing all the important enhancements that have been made since you last upgraded**, which will help you capture hours and generate bills more easily and more accurately than ever.

**Upgrade to Sage Timeslips 2020 By May 15, 2019 and Get Introductory Savings!<sup>1</sup>**

To accompany the 2020 release, we're offering introductory savings of 20% on a 2020 license. And you can save a total of 30% when you get Sage Timeslips 2020 and Sage Business Care together!<sup>2</sup> (See back of this notice for details.)

## Enhancements in Sage Timeslips 2020:

- Bills: Unapplied Funds Search
- LawPay Integration: Client Funds Transaction
- Transactions: Ability to create a reverse payment from an existing payment
- Transactions: Apply a Credit to all open invoices
- Slips: Easier management of running timers
- Transactions: Ability to pay invoice from A/R list
- Bills: Bills Completed dialog shows additional information
- Bills: New option to simplify bill filtering
- Transactions: New totals at bottom of Accounts Receivable list
- Reports: Add type search filtering to hand select filters
- Reports: Move to specific page on previewed reports

# UPGRADE NOW TO SAGE TIMESLIPS 2020

and get all these enhancements . . .

## Bills

Unapplied funds search  
Search for clients who have unapplied balances and avoid incorrect fees or interest charges.

New option to simplify bill filtering  
When preparing for billing, you can now include only those clients with billable charges. On worksheets, use the new “Include bills with activity and no billable charges” option; on billing assistant, use the new “any billable charges” rule.

Completed dialog shows additional information  
This screen now shows additional totals, such as number of bills that will be sent by email and the number of clients with no data, so you have a better view of your bill run.

## Reports

Move to specific page on previewed reports  
When previewing reports to Display, you can move to a specific page.

Add type search filtering to hand select filters  
When using name filters, you can type in a few letters to quickly locate desired clients, task or expenses.

## Slips

Easier management of running timers  
Stop Timers screen now shows which timers are running and who started them.

## Transactions

New totals at bottom of Accounts Receivable list  
Instantly see totals for debits and credits.

Ability to pay invoice from A/R list  
From the Accounts Receivable List, right-click on an Invoice and choose Pay This Invoice to simplify invoice payment.

Apply a Credit to All open invoices  
When entering a credit, you can now apply it to all open invoices.

Ability to create a reverse payment from an existing payment  
From the Accounts Receivable List, right-click on a Payment and choose Reverse This Payment to simplify payments reversal.

## For LawPay Users

In the 2019 release, Sage Timeslips introduced enhanced integration with LawPay<sup>1</sup> to give you the ability to include a “pay now” link with your client invoices so they can pay online via a LawPay virtual terminal.

And now, with the 2020 release, you can even accept online payments for Client Funds or Escrow accounts!

In addition to all the enhancements introduced in Sage Timeslips 2020, you're running your business without all the improvements added since you last upgraded.

***If you're using Sage Timeslips 2016 or earlier, you're missing all the enhancements shown on this chart.***

<b>Firebird database</b>	The SQL-like database platform improves overall performance and speed (in some cases five times faster than prior Sage Timeslips applications), especially in networked environments with a large number of users. The database will also be more resilient to corruption due to network transmission outages or latency.
<b>Quick Bill</b>	Create or select a client, create time and expense slips, choose the appropriate taxes to apply, and make a full or partial payment all in one centralized location.
<b>Visible email address on worksheets</b>	Include client email addresses on the pre-bill worksheet.
<b>My List indicator</b>	For easy recognition of appreciated lists of clients.
<b>More timekeepers for fee allocation</b>	Users can now assign up to 10 timekeepers categories to track and report on fee allocation.
<b>Customer calculated fields on invoices</b>	You can you add specific, customizable billing information on all your billing.
<b>Customized work weeks</b>	You can set the "first day of the week" for more accurate reporting.
<b>"Client Contacts" for Client info</b>	Contact information of important resources for clients can easily be stored, accessed, searched and filtered to better service clients in Timeslips.
<b>LawPay "Pay Now" integration</b>	Sage Timeslips and LawPay users can include a "pay now" link on invoices to satisfy/pay accounts receivable balances online via a LawPay virtual terminal.
<b>Timesheet Entry Filtering</b>	This enhancement lets you filter the Timesheet list of templates to a specific client, references, and tasks for a cleaner, more manageable view.
