- Office 365 (Outlook | Excel | Word) ***

* Not tested with Version 2017 Perpetual and below products

** Server system requirements applicable to dedicated server network configuration

*** Compatibility with Office 365 depends solely on the products offered within the Office 365 product suite.

**** Sage Timeslips Premium and 2017+ refers to our subscription licensed product and Sage Timeslips 2017 perpetual (and future releases) utilizing the Firebird SQL database platform. System requirements listed are not intended nor applicable to the Sage Timeslips perpetual product running using a Borland Database (BDE).

Virtual machines are not supported by Sage due to the complexity of configurations
